

## The Ostrich

The Ostrich is the largest of all birds. Some of them are nearly eight feet high. The Ostrich is so strong that they can even carry a man. It has a long neck and a tiny head. It carries its head and neck erect.

The wings of the ostrich is so small that it cannot fly as the other birds. But it can run fast.

The Ostrich defends itself from enemies by kicking. A kick by its leg could even harm a horse or a man? The food of the ostrich is grass and leaves.

The native country of the ostrich is AF-Rica. The people cannot catch them easily, because they run fast. The feathers of the ostrich are very expensive. Therefore some people hunt them to get their feathers.

Ladies in European countries use ostrich feathers for their hats.
